

Free course to start your career in *retrofit construction*

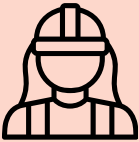

Free two-week course

The need for qualified retrofit professionals is growing with rising energy costs and the drive for more energy-efficient homes.

Sign up for this course to help you understand more about domestic retrofit and boost your career choices in this growing industry.

Qualifications and experience

- Level 1 Health and Safety in a Construction Environment.
- Level 2 Understanding Domestic Retrofit.
- Construction Skills Certification Scheme (CSCS) preparation.
- End of course online assessment.
- Work placement and local job opportunities.

What is domestic retrofit?

Retrofitting is improving an existing building to increase energy efficiency and reduce waste.

Understanding retrofitting basics can help open career choices such as becoming a solar panel installer, retrofit coordinator, and electric vehicle charge point (EVCP) installer.
