

HOLLOWAY PARK

Dear Neighbour,

We are taking action to ensure the works on site at Holloway Park do not damage any of the surrounding plants and trees in private gardens or communal areas. This work will mean us installing a 1.5 metre retaining wall on our side of the boundary to ensure existing roots are not damaged. This retaining wall will not be visible from your home.

Where there are plants or trees overhanging the boundary, these may need to be carefully pruned to ensure access is possible for these works – this will only be done as and when the London Borough of Islington Tree Officer is happy that no lasting damage will be done or nesting birds disturbed.

We do not need to access your property to carry out the work.

If you have any questions please contact us on the details below.

Kind regards

London Square Construction Team
